

HYDRAULIC ENGINEERING REPAIR SERVICES

HERS Guarantee

Components (individual and assembled) and processes are subject to a comprehensive guarantee to which end HERS undertakes the rectification of faulty workmanship and manufacture, at no additional cost. New cylinders and repaired are covered by a 12-month warranty or 3000 hours, whichever occurs first. Overhauls on transmissions, gearboxes and differentials carry a 1000 hours or 6 months, whichever ever comes first, from date of delivery. The undertaking is supported by insurance coverage of consequential damage due to faulty componentry and poor workmanship on the part of HERS.

The capabilities of the company should not be measured by its size, but rather by the gravity of its undertaking to provide quality products and service. Technologies and product ranges are constantly updated and expanded despite which the principals of availability, quality and affordability are closely guarded.

Our best references are our products and our customers.
